Alan -
I think the curvilinear features on the Rocks east for are boulder fronts associated with debris flow surges, not beach strands as shown on preliminary geologic map prepared by Steve Personius. Would you please pass this on?
Thanks.
JR

Mapped, edited, and published by the Geological Survey

Control by USGS and NOS/NOAA

Topography from aerial photographs by multiplex methods and by plane-table surveys 1925-26
Aerial photographs taken 1950. Field check 1952

Polyconic projection. 1927 North American datum
10,000-foot grids based on Utah coordinate system, north and central zones

Red tint indicates areas in which only landmark buildings are shown

Dashed land lines indicate approximate locations

1000-meter Universal Transverse Mercator grid ticks, zone 12, shown in blue

Revisions shown in purple compiled from aerial photographs taken 1969 and 1975. This information not field checked

Purple tint indicates extension of urban areas
