LANDSLIDE, DEBRIS FLOW, AND ROCK FALL SPECIAL STUDY AREA MAP

SALT LAKE COUNTY, UTAH

Per the Geologic Hazards Ordinance (Chapter 19.75 of the S.L. County Zoning Ordinance), site-specific geologic hazard investigations are required in special study areas, and may be required in areas within the Foothills and Canyons Overlay Zone (Chapter 19.72, adopted January 21, 1998), areas where slopes are in excess of 30 percent, and areas where site conditions indicate a potential for geologic hazards.

EXPLANATION

Map Symbol		Map Unit	References for Mapped Units
	DF	Debris Flow and Alluvial Fan Deposits	1, 2, 5, 9
	DFh	Historical Debris Flow Event	7, 14
	LS	Landslide Deposits	4, 8, 9
	R	Rock fall, Rockslide, and Talus Deposits and Rockfall Source Areas	3, 6, 10, 11, 12, 13
