AKH *District 1*

SUBJECT: Mudflows, Earthflows and Landslides
in District One

At your request, I have plotted on the attached Materials Inventory Maps, major mudflows, earthflows and landslides which are either in our right-of-way or relatively close to our highways in District One.

In general, the areas plotted represent relatively large unstable areas; however, in some instances small areas which have been particularly bothersome are shown.

In addition to the areas marked on the maps, there are two sections of highway which contain numerous small slumps. The first is SR-89-91 from Mantua in Box Elder County to Wellsville Canyon in Cache County. The second is SR-226, which is the road to the Snow Basin Ski Resort in Weber County.

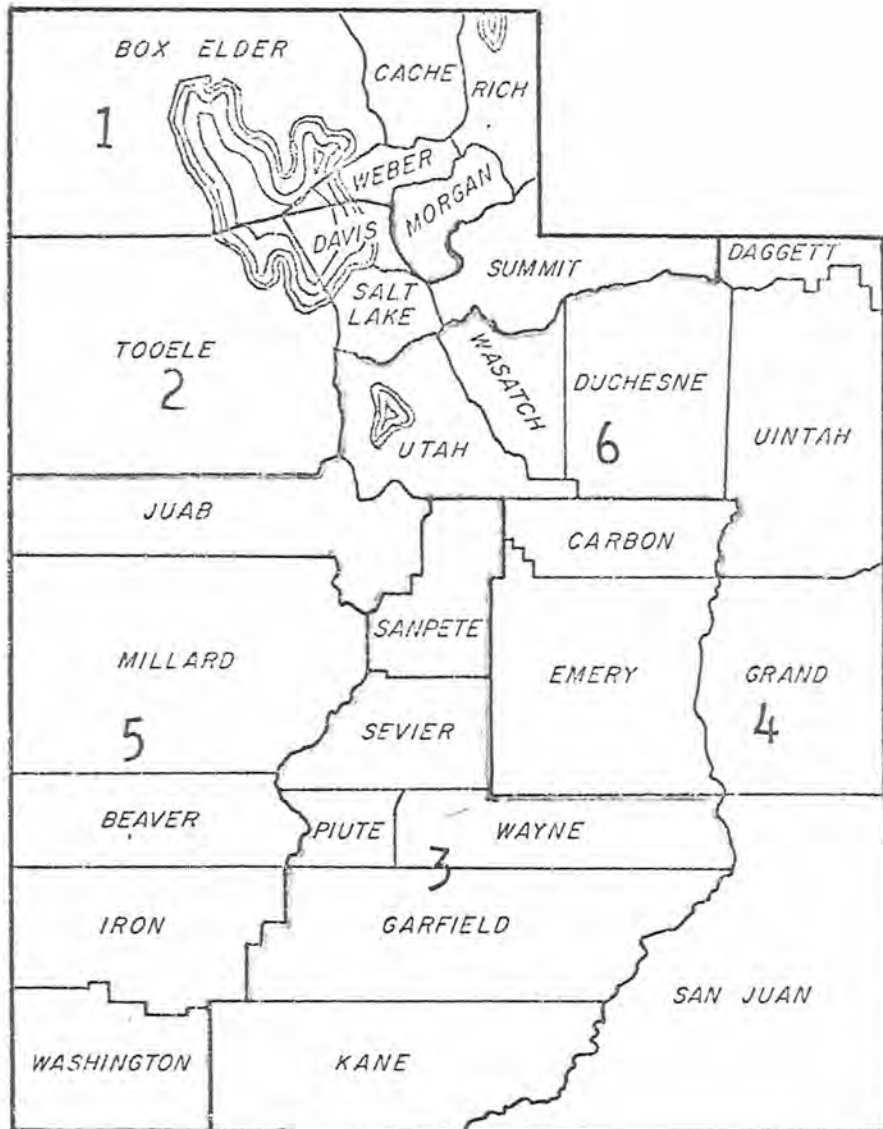

If you have additional questions, please call me.

Memorandum

UTAH DEPARTMENT OF TRANSPORTATION

DATE: November 16, 1984

TO : Heber Vlam, Engineer of Materials and Research

FROM : Albert J. Spensko, District #4 Materials Engineer

SUBJECT: Slide Areas in District 4

As per your memo of November 7, 1984, the following areas have been designated as potential slide areas that may or have already created problems with our highways.

Highway No.:	U-31	U-29	U-46	US-191	U-263	U-33
Mile Post :	21.1	4.0	19-20	16	14-15	163.7-165.7
	22.0	4.6				
	24.0	5.9				
	24.7	6.0				
		6.9				

Highway U-96
Mile Post 0.00 Clear Creek
9.6
14.3-15.0

Highway US-06 - Skyview to Castle Gate
Mile Post 204 - Slide on Creek
204.3 - Shoulders sliding into wash
204.4 - Shoulders sliding into wash
204.5 - Shoulders sliding into wash
208.0 - Shoulders sliding into wash
206.2 - Massive slide on North
206.3 - Massive slide on North
209.0 - Shoulders sliding into wash

Beginning at Mile Post 222 to Mile Post 226, this is the Price Canyon area. Numerous slides are present in this 4 mile section. Practically every cut section shows signs of a potential slide. Slides have occurred, but none has covered the highway. However, with the increased moisture conditions, I have observed more movement in the past year. These areas bear watching.

Memorandum

UTAH DEPARTMENT OF TRANSPORTATION

DATE: Nov. 14, 1984

TO : Heber Vlam, P.E., Engineer of Materials and Research

FROM : *Carl Craner*
Carl Craner, District Six Materials Engineer

SUBJECT: Landslide Inventory *District Six*

As directed by you we have reviewed the landslides in District Six. The inventory includes only the slides that have affected the State Road system. We have several of the areas mapped and photographed.

The list is as follows:

1. SR 44 at approximately mile post 20.6 in Daggett County
2. SR 44 at approximately mile post 18 in Daggett County
3. SR 33 at approximately mile post 13 in Duchesne County
4. SR 6 at approximately mile post 182 in Utah County
(Diamond Fork)
5. SR 6 and SR 89 at mile post 185.5 on SR 6 in Utah County
(Thistle) There are several minor landslides in this area.
6. SR 6 at approximately mile post 207 in Utah County
(Gilluly)
7. SR 15 at mile post 243.5 in Juab County. This is a small slide on the toe of a large older landslide.
8. SR 92 at approximately mile post 11 in Utah County
(Tank Canyon area)
9. SR 189 at approximately mile post 16.5 in Wasatch County
(Hoovers) This is a large active landslide that is well mapped.
10. SR 40 at approximately mile post 7 in Wasatch County
(Bottom of Phoston Hill)
11. SR 40 between mile post 33 and 34 in Wasatch County
(Daniels Canyon above McGuire)
12. SR 40 at mile post 44 in Wasatch County
(Hills east of Strawberry Shed)
13. SR 40 at mile post 46.5 in Wasatch County
(Above old Trout Creek boat camp site)

There are several landslide areas that have not been connected with the state system. Most of the areas have been mapped by the U.S.G.S.

Memorandum

UTAH DEPARTMENT OF TRANSPORTATION

DATE: Nov. 14, 1984

TO : Heber Vlam, P.E., Engineer of Materials and Research

FROM : *Carl Craner*
Carl Craner, District Six Materials Engineer

SUBJECT: Landslide Inventory

As directed by you we have reviewed the landslides in District Six. The inventory includes only the slides that have affected the State Road system. We have several of the areas mapped and photographed.

The list is as follows:

1. SR 44 at approximately mile post 20.6 in Daggett County ✓
2. SR 44 at approximately mile post 18 in Daggett County ✓
3. SR 33 at approximately mile post 13 in Duchesne County
4. SR 6 at approximately mile post 182 in Utah County ✓
(Diamond Fork)
5. SR 6 and SR 89 at mile post 185.5 on SR 6 in Utah County
(Thistle) There are several minor landslides in this area.
6. SR 6 at approximately mile post 207 in Utah County ✓
(Gilluly)
7. SR 15 at mile post 243.5 in Juab County. This is a small slide on the toe of a large older landslide.
8. SR 92 at approximately mile post 11 in Utah County
(Tank Canyon area)
9. SR 189 at approximately mile post 16.5 in Wasatch County
(Hoovers) This is a large active landslide that is well mapped. ✓
10. SR 40 at approximately mile post 7 in Wasatch County ✓
(Bottom of Phoston Hill)
11. SR 40 between mile post 33 and 34 in Wasatch County
(Daniels Canyon above McGuire) ✓
12. SR 40 at mile post 44 in Wasatch County ✓
(Hills east of Strawberry Shed)
13. SR 40 at mile post 46.5 in Wasatch County
(Above old Trout Creek boat camp site) ✓

There are several landslide areas that have not been connected with the state system. Most of the areas have been mapped by the U.S.G.S.
