

100th Anniversary Earthquake Conference

APRIL 18-22, 2006
SAN FRANCISCO, CALIFORNIA

COMMEMORATING THE
1906 SAN FRANCISCO EARTHQUAKE

Sponsoring Organizations:

Earthquake Engineering Research Institute
499 14th Street, Suite 320, Oakland, CA 94612-1934
Tel (510) 451-0905 Fax (510) 451-5411 Web: <http://www.eeri.org>

The Seismological Society of America
201 Plaza Professional Building, El Cerrito, CA 94530
Tel (510) 525-5474 Fax (510) 525-7204 Web: <http://www.seismosoc.org>

California Governor's Office of Emergency Services
3650 Schriever Ave, Mather, CA 95655
Tel (916) 845-8510 Fax (916) 845-8511 Web: <http://www.oes.ca.gov>

Creation and distribution of this CD-ROM supported by FEMA and USGS.

This PROCEEDINGS CD-ROM contains:

- Conference Program
- Full text of approximately 1,000 8NCEE papers
- Full text of all DRC papers
- 600 SSA abstracts
- Text searchable, indexed by author, title, and topic
- List of sponsors
- List of exhibitors

Geological Society of America

The Geological Society of America is an international organization and its applications in understanding the structure of the Earth. Founded in San Francisco, the GSA will begin a year's celebration of its centennial in the general areas of geology, earth motion, earth structure, and earth resources.

Earthquake Engineering Research Institute (EERI)

EERI is the primary U.S. nonprofit membership organization for researchers, practicing professionals, educators, and government officials actively involved in earthquake risk reduction. A national technical society of leaders in engineering, architecture, geotechnical sciences, and the social and policy sciences, EERI's programs draw on a uniquely multidisciplinary membership to forge links between research, new knowledge, design, practice, and policy. The objective of EERI is to reduce earthquake risk by advancing the science and practice of earthquake engineering; by improving understanding of the impact of earthquakes on the physical, social, economic, political and cultural environment; and by advocating comprehensive and realistic measures for reducing the harmful effects of earthquakes.

The Seismological Society of America

The Seismological Society of America is an international society devoted to the advancement of seismology and its applications in understanding and mitigating earthquake hazards and in imaging the structure of the Earth. Founded in San Francisco in the months following the 1906 earthquake, SSA will begin a year's celebration of its 100th anniversary at the Conference. Papers will be presented in the general areas of seismology, paleoseismicity, seismicity, seismic hazards, ground motion, earth structure, seismotectonics and the effects of earthquakes.

The California Governor's Office of Emergency Services

The DRC is designed to bring together emergency management professionals, local and state government representatives, and private business partners to share ideas, technology, and resources for the purpose of mitigating disasters. In 2006, DRC will strive to promote public-private partnerships in an effort to reduce the vulnerability of individual communities to earthquakes and other natural and human-caused disasters. In addition, the DRC will continue to highlight California hazard mitigation success stories and to recognize those California communities that have made significant strides toward making their individual jurisdictions Disaster Resistant California Communities.

USING THIS CD

The program will run automatically. To launch it manually, run START.HTM.
